   7) On Free-Text search for Location we have added suggestions matching to the entered location, so user will be always entering the search from a valid location only.
    8) Browser Back Functionality when switching between tabs.
    9) Option to Re-Tweet for twitter social feed, Share for Facebook social feed and Pin to Pinterest feed added on social feeds.
   10) Linking to the original feed on click of social feed.
   11) Twitter Login is replaced with Google login.
   12) User Login and Registration.

   SEARCH PAGE:
   1) New Map View and Compare (Grid) view included, along with listing view.
   2) Cuisine and Location is implemented for all (All, Delivery, Takeout, Reservation and Dine-In).
   3) Type Of Place is implemented for "All, Reservation and Dine-In".
   4) Auto Update of search result on delivery/takeout date and time change as per discussion.
   5) Auto Update of search result on dine-in/reservation date change as per discussion.
   6) City change functionality without page reload.
   7) Login without page reload
   8) Bookmarks adding with login and without page reload.
   9) Auto Result update on City Change
   10) Delivery/Takeout Auto Timeslot changes on city change
   11) Lazy Loading for list and compare view, with interval of every 3 pages.
   12) Quick menu for restaurant listing pages
   13) Sorting Filter added with reference to current Munchado.com sorting criteria. (Popularity is not included in this build)
   14) Remove All or Individual filters if selected any of cuisine or type-of-place.

   KNOWN FUNCTIONALITY ISSUES/TASKS/CHANGES
   1) "About Us" is not included
   2) Twitter login and captcha registration in will be implemented if necessary.
   4) Map view is not available for food view as already discussed
   5) New list of cuisines and type of place is not implemented
   6) Some Icons are missing for "Type Of Place" on restaurant listing and map view (for dine-in and reservation)
   7) Popularity sorting is not available.
   8) Select City is not implemented as per new changes. It will be shown as modal box in current build

If you need more detailed release note then do let me know the depth of details. I hope we will not be receiving any mails from bugzilla for known functionality issues/tasks/pending-changes from QA team.

NOTE:
** UI changes are implemented as per screens provided by Adit.
